## REPORT OF SCHOOL BOARD

---

We hear it said quite often that our schools are not as good as they used to be. If so, what is the cause? We do not feel like blaming the teacher alone when the school is not a success. We think the parents should have a share of it, although we have seen instances, where in our judgment the teacher was much at fault. We believe in nine cases out of ten when a teacher is unsuccessful it is from a lack of discipline, and we would try and impress strongly on the minds of teachers the necessity of good order in our schools. That, together with the faculty for imparting instruction, will make a successful teacher. Unless a teacher has the qualification to maintain good order she should never undertake to teach a rural school.

Parents and citizens, you can do much to improve our schools: by becoming more interested in them, other than in a critical way. An influence over your children in favor of their doing well at school and being constant and regular in attendance, will have a most favorable effect, while the reverse would have a bad effect and tend to the discouragement of the teacher and discredit the scholars and school.

## REPORT OF SUPERINTENDENT OF SCHOOLS

---

To the School Board and Citizens of Harrisville:

I submit my third annual report as superintendent of schools. Part 1 will deal with matters common to all the towns in this supervisory union, and Part 11 with your own school affairs.

### PART I

**Attendance.** The attendance in all the schools has shown considerable improvement. In most communities it is a matter of pride with parents and pupils alike. In a few, however, there are still some parents who seem to feel that it is not necessary to see that their children meet the full requirement of the attendance law, to attend school "during **all the time** the schools are in session." A few still appear to think it is their privilege to send children on errands or to keep them at home for work. The law makes no such exception and the only cause recognized as good reason for absence is sickness.

For the past year and a half I have required monthly reports from all the teachers. Summaries of these attendance reports are returned to the teachers as soon as they can be prepared, and a definite campaign for better attendance has been in progress, especially through the fall and winter of this year. The following table shows what results have been secured, as compared with the attendance last year and the year before last.

School	Average attendance in all schools		
	1919-1920	1920-1921	1921-1922 (4 months)
Marlboro

**Grading and Tests.** The grading in most of the one-room schools was considerably below standard two years ago. It did not seem wise to make wholesale changes at once but rather to bring about desired improvements gradually by making careful promotions at the end of the year and by the improvement of teaching as rapidly as possible. Considerable progress has been made in most of the schools, but there are now several where the standard is low for the upper grades and where some pupils are doing work in two or three different grades. This will be corrected as the older pupils pass out of school, but we shall be able to make some improvement before that time by the application of definite standards of promotion in all grades. Standard tests are being given this month in all grades in several subjects, and one general intelligence test. These will be repeated in June, and on the basis of results in them, supplementing the teachers' records of daily work, we shall be able to make promotions with greater certainty of fairness to the pupils.

**Health Program.** Increasing attention is being given to matters of health. Physiology and hygiene are taught not merely for the information the books contain, but the aim is to make the practical application in daily living that will result in better health. The annual inspection by the school physician discovers physical defects which are reported to the parents, and in some case remedial treatment has been secured as a result. I would urge all parents receiving the physician's notices to consult their own family physicians and secure treatment, for a child's physical condition has considerable to do with his mental condition and can be remedied more easily while the child is young. As a supplement to the physician's work, the children are weighed at intervals of about a month and their weights recorded on a chart, which also shows age, height, and normal weight, so that a child can tell from the

chart whether he is normal or under-weight. Suggestions are given from time to time to those who are under-weight to help them to know how to improve that condition. In places where a visiting nurse is available this work can be extended to reach the home and assist the parents, but without a nurse the teacher and superintendent must do what they can by instruction and advice to the children.

**Corporal Punishment.** There seems to be an impression in some quarters that corporal punishment is forbidden. Such is not the case. We do strongly believe that a good teacher will find very few occasions for using so extreme a punishment, and the best teachers are those who seldom have to punish in any way, but we recognize that there does occasionally arise a situation where nothing will prove quite so effective as a good spanking or strapping. Teachers are cautioned to use care and good judgment, but not to "spare the rod and spoil the child."

**Holidays.** There is another notion that I wish to correct—that schools **MUST** be closed on certain legal holidays. There is no mention of holidays in the school law, and the decision whether school may be closed on a holiday or at any other time rests entirely with the school board. Moreover, when no special observance of such a holiday as Armistice Day, Columbus Day, Washington's Birthday, and others, is made in the community, to close the school for all day is to miss a valuable chance to teach the lesson of the day to the children, and to remind others of its significance, by appropriate exercises in the schools, to which the parents and citizens generally are invited.

## PART II

**State Aid.** The last legislature made several important changes in the school laws relative to the distribution of state

aid. The \$5 tax is now levied on the basis of the equalized valuation, so that you raised nearly \$200 more this year than last year to meet the first condition for state aid grant. Another amendment provided that in case the money appropriated by the legislature was not sufficient to meet all of the approved claims for state aid a sufficient number of towns should be cut off from the list of towns having approved claims, beginning with those in which the cost of schools the previous year was lowest per \$1,000 of valuation. Since Harrisville was among the lowest towns in this list, and the money appropriated in the legislature last year was insufficient, you have lost most of your state aid. Another amendment provided that the State Board might take out not exceeding five per cent of the state aid money available, with which to give some aid to towns not receiving any aid in the regular distribution. The approved amount for Harrisville was very small, as is shown in the budget following this report, and the reduced amount is only \$9.23.

The loss of state aid does not mean that you will have a deficit this year, however, for without it the estimated income exceeds the proposed expenditures by about \$170.

Respectfully,

VERNON S. AMES,

Marlboro, N. H., Feb. 10, 1922.
